PROFILE

I'm Christian Forcada Vitalla. An ambitious problem solver with a great passion for software development. I have a lot of experience in creating logical and innovative solutions for complex problems. I love shaping an idea, carrying it out and putting it into production so that it can add value. Responsible and dynamic, I have a great team spirit and I adapt very well to work enviroments. I am organized and meticulous in my tasks. I am a proactive person and I consider myself self-taught, always willing to learn new techniques, evaluating and updating my skills to stay ahead of the web development. I always try to carry out my work in the most effective and efficient way. I am a very open-minded and cheerful person, I like dealing with people and I know how to adapt to the needs and requirements of each project.
